

# STRESS TEST YOUR STUFF

## Product Concepts, Business Plans, VC Pitches

Get the same strategic help as AT&T, New England Journal of Medicine, Alcatel-Lucent and a host of Silicon Valley start-ups. We always qualify prospective clients, including those named above, with an intense 4-hour whiteboard session.

It is a safe environment within which to test the comfortable assumptions that have been made - about the real needs, the perceived opportunity and the revenue expectations - and to benefit from ideas and insight from our team of grizzled veterans.

With a team of strategists, business consultants, designers, solutions architects and software engineers, productOps will assemble the right people to ask demanding questions and contribute in a collaborative manner, always led by company founders Bob Cagle and Dean Pfutzenreuter.

## Let's Do this

Beyond prospective clients for its core software business, **productOps offers this 1/2 day strategy workshop** as a standalone activity for organizations of all types wishing to have perceptive, independent eyes and fresh sets of brains applied to their intended project.

**1/2 Day Strategy Session | \$9500**

As an Advanced Amazon Consulting Partner, productOps has been building AWS-based solutions for clients since its inception.

**Give us your hardest problem**
